Objectives and Investment Policy

Investment Objective

The investment objective of the Fund is to generate capital growth by investing in an internationally diversified portfolio of shares and units in collective investment schemes (CIS) and individual high quality fixed interest instruments.

The Fund is primarily a fund of funds that pursues its investment objective by investing primarily in a portfolio of regulated collective investment schemes and fixed interest securities.

In seeking to achieve its investment objective and policy, the Fund seeks exposure to international equity markets up to a maximum of 55% of its net asset value.

Exposure to all asset classes will primarily be achieved by investing in the shares or units of regulated collective investment schemes. However, up to a maximum of 40% of the Fund's net assets may be invested in direct assets, primarily in debt securities consisting of bonds (both corporate and sovereign, fixed and floating) and to a lesser extent in equities. The Fund may also invest in liquid assets such as bank deposits and money market instruments including government and corporate bonds. There is no maximum or minimum amount of liquidity that the Fund may hold at any one time.

Both listed and over the counter financial derivative contracts may be used for the purposes of efficient portfolio management. Risk and Reward Profile

The T USD (Accumulation) (the "Class") (IE00BFXG4L89) has been classed as 4 because of its historical volatility of returns.

A category 1 Fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a category 7 Fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex. For example, a category 2 Fund is not twice as risky as a category 1 Fund. Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may change over time.

Investing in the Fund carries additional risks not covered by the risk and reward indicator, which includes the following:

The value of your investment can go down as well as up. You may not get back the amount you have invested.

There can be no assurance that the Fund's assets will increase in value.

Investment in the Fund is not in the nature of a deposit in a bank account and is not protected by any guarantee scheme. Investment in non-UCITS CIS may expose investors to increased risks due to restrictions on withdrawals, less strict regulations and use of derivatives at the underlying CIS level. The value of the Fund may be affected by a change in the creditworthiness of the issuers of its securities and by adverse movements in interest rates.

A default by or an insolvency of a counterparty to an exchange traded or over the counter derivative contract may result in a loss to the Fund.

Material risks are also applicable to other share classes being represented.

Please refer to the Canaccord Genuity Investment Funds plc prospectus and supplement issued in relation to the Fund for further details on risk factors.
